Date,

High hill. - Congl. II, dip SE

Midland Hill N. by W. then S. W. Carboniferous

outcrop. dip SE, near NW  
N. side of hill. High hill in Union Co. N. of  
Chapel Hill. dip SE

St. Paul  
Church Hill  
Church Hill

St. Paul. dip NW

St. Paul. dip NW

On road. Congl. outcrop. dip SE. NW side of hill.

Along road. Congl. outcrop. dip SE. NW side of hill.

Along road. Congl. outcrop. dip SE. NW side of hill.

Along road. Congl. outcrop. dip SE. NW side of hill.

at Taggart's Ferry a sharp anticlinal of  
 coarse conglomerate is flanked on both  
 sides by carbonaceous schists.  
  
 At Sachuest a slaty conglomerate  
 is overlaid by siliceous greenish?  
 argillite, and this by coarse grit  
 sandstone including in coaly layers  
*Ambalaria longiporia* etc.

at Paradise west is a synclinal  
 of conglomerate. on east side  
 a broken zone of same.  
 At Bess Cave at NW end of  
 Carleton's Pond is conglomerate like  
 that at Carleton's neck. dip NW.  
 At 4 is green argillite shales =

Exposures along west margin of the <sup>88</sup>  
clastic area, east of Albany Pond  
northward through Kerfoot.

At 27 is a ravine south of which tower  
noble hill is 20 ft. light grey shists. green  
with congl. Dip 20 N.

At 28, west of hill congl. + alga. lites.  
Dip 40-50 E.

Summit of hill congl. in aprilla areas  
out. Dip 15-25 E.

out again at 29.

Shists like 27 at ~~28~~ 30.

Cover like

In our west end eastward to along stream bed to all back early sand then more sandy of sand made then the pebbles. E and S. seen near bridge, covered.

Coaly shale  
Thin congl. med.  
shale

6  
19

25. Deep W dip, under this congl. faulting, fault  
then rises to west bearing. How best dip of 20 W

Cut top of contact

8 greenish ss, medium

4-5" congl, medium

6-7" " ss

7-8 " congl, very large pebbles, rising in the  
bank to westward, = S pitch.

12-14 greenish ss.  
Fading to ss on both sides.

Coaly shale on east side of ss on east of fault.

Coaly shale on west side of fault.

Coaly shale on west side of fault, dip fault to east

30 Coaly shale

Due to some congl. remnant in the hill

head N E of Vandenberg house, in road

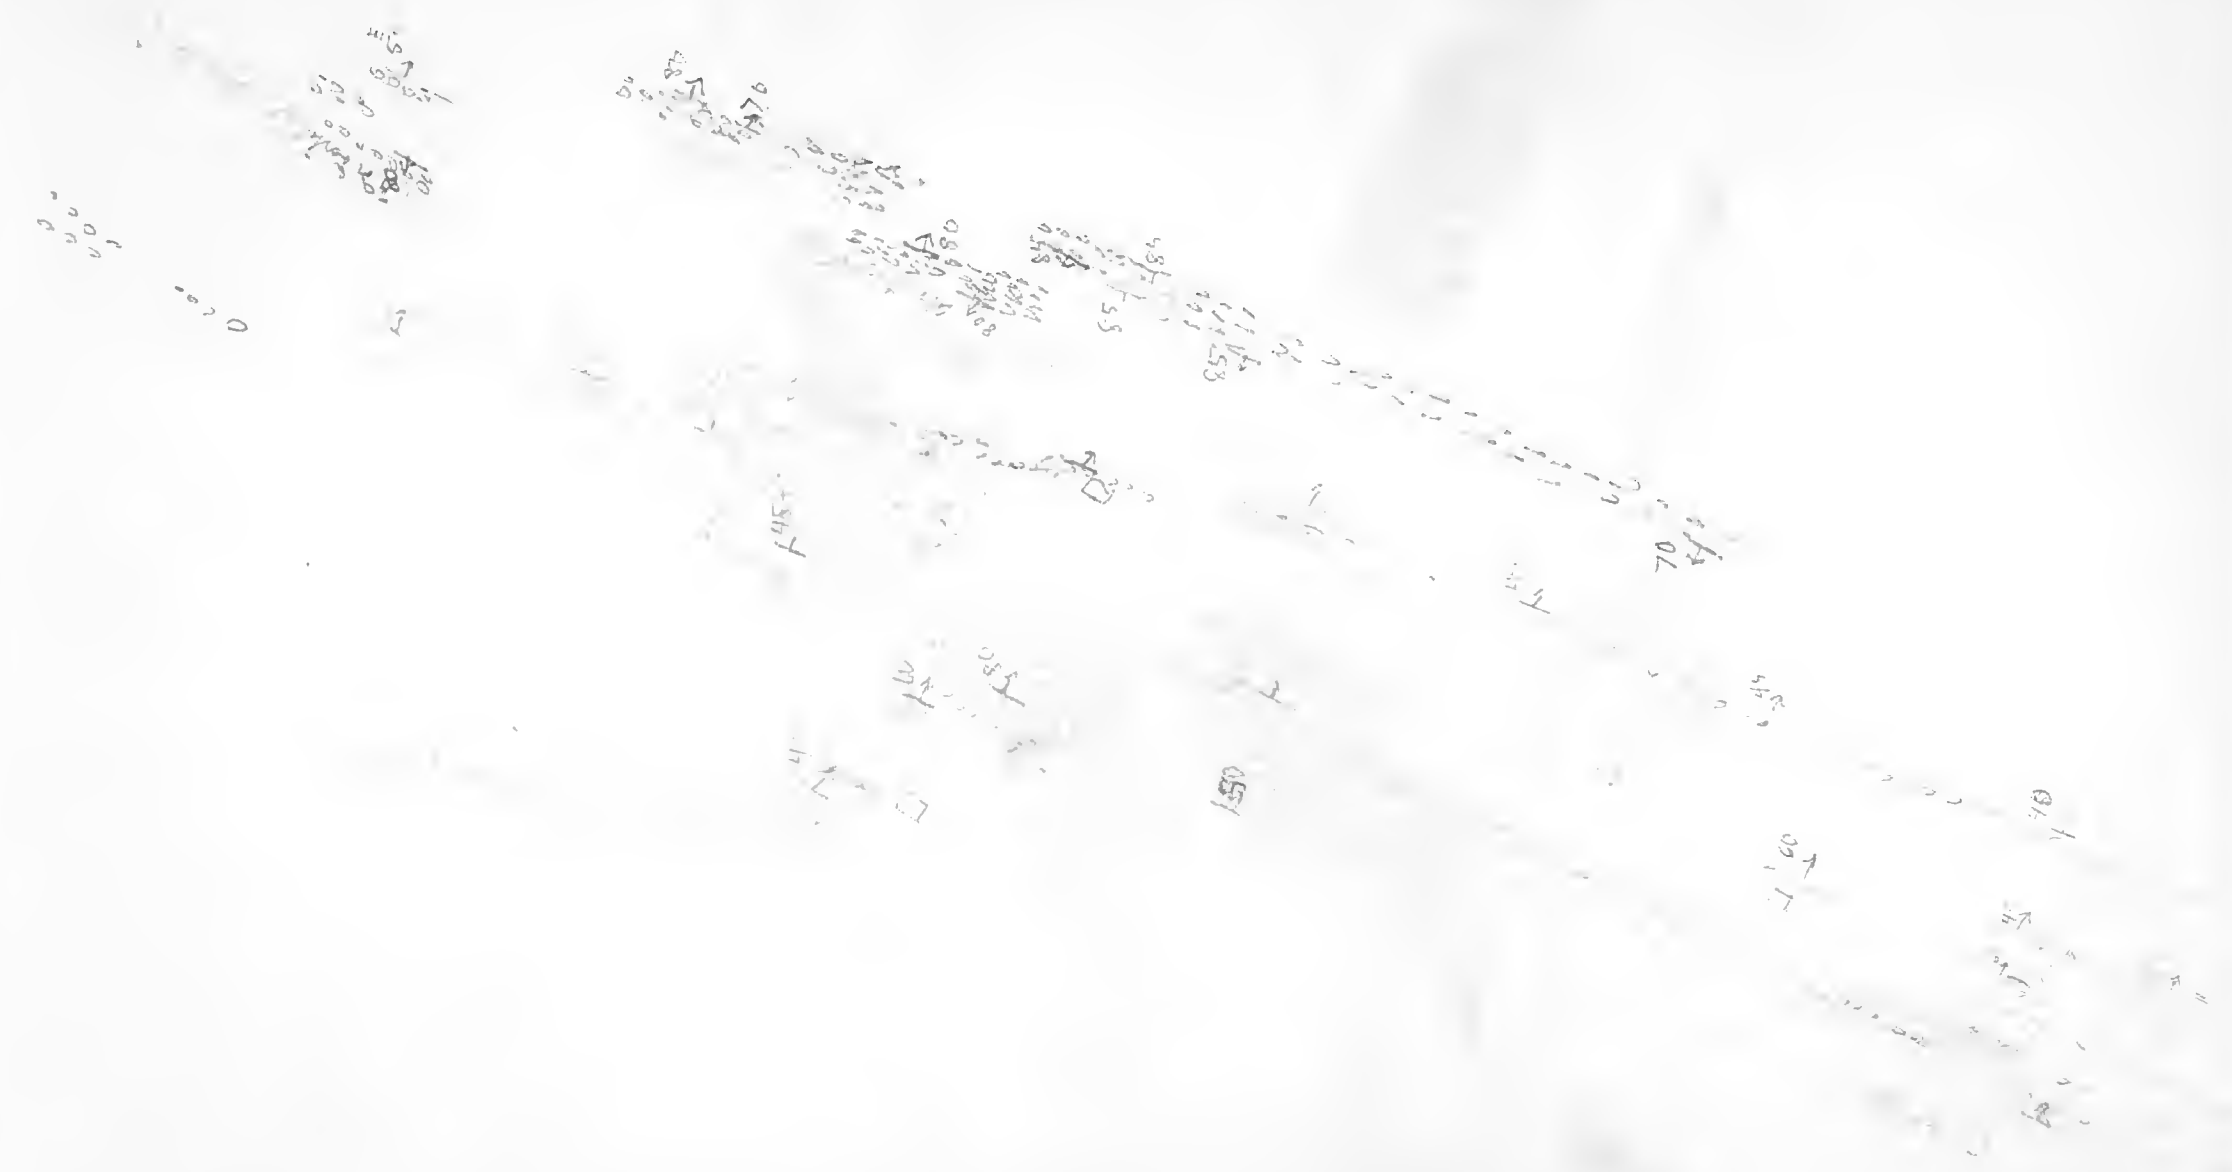

cut, it rises in the hill with a north

ward dip of 20 W, dip fault to east

The first thing I noticed when I  
 stepped out of the train was the  
 cold. It was a sharp contrast to the  
 warm weather of the South. I  
 had heard that the weather was  
 just what I needed, but I was  
 not prepared for this. I had  
 packed for a warm climate, but  
 now I was in a land of snow.  
 I had to buy a heavy coat and  
 gloves. It was a bit of a shock,  
 but I was glad to be here.  
 The people were friendly and  
 the food was delicious. I was  
 in luck. I had found a place  
 where I could stay for a few  
 days. It was just what I needed.  
 I was in good luck. I had  
 found a place where I could stay  
 for a few days. It was just what  
 I needed. I was in good luck.

The second thing I noticed when I stepped out of the train was the

The third thing I noticed when I stepped out of the train was the  
 fourth thing I noticed when I stepped out of the train was the  
 fifth thing I noticed when I stepped out of the train was the  
 sixth thing I noticed when I stepped out of the train was the  
 seventh thing I noticed when I stepped out of the train was the  
 eighth thing I noticed when I stepped out of the train was the  
 ninth thing I noticed when I stepped out of the train was the  
 tenth thing I noticed when I stepped out of the train was the
